

Help Line

Help Line allows you to call a predesignated number of emergency service by simply lifting the handset.

What Help Line does for you:

- Eliminates need to remember emergency numbers.
- Emergency calls can be placed quickly and automatically.
- Enhances safety and security for people who are alone (particularly children, elderly, or a sick relative).

To use:

1. Lift handset and wait. Within 14 seconds, the predesignated number will be dialed automatically.

Predesignated Number: _____

Name: _____

2. If you do not wish to dial the predesignated number, you may dial any number before the predetermined seconds have elapsed.

Note: The predesignated number and timeout duration is selected by you when you order your Help Line service. To change this number or timeout duration, you must contact the telephone company—a service order charge will apply.
